OpenCV (via python) on Linux: Set frame width/height?

I'm using openCV via python on linux (ubuntu 12.04), and I have a logitech c920 from which I'd like to grab images. Cheese is able to grab frames up to really high resolutions, but whenever I try to use openCV, I only get 640x480 images. I have tried:

```
import cv
cam = cv.CaptureFromCAM(-1)
cv.SetCaptureProperty(cam,cv.CV_CAP_PROP_FRAME_WIDTH,1920)
cv.SetCaptureProperty(cam,cv.CV_CAP_PROP_FRAME_WIDTH,1080)
```

but this yields output of "0" after each of the last two lines, and when I subsequently grab a frame via:

```
image = cv.QueryFrame(cam)
```

The resulting image is still 640x480.

I've tried installing what seemed to be related tools via (outside of python):

```
sudo apt-get install libv4l-dev v4l-utils qv4l2 v4l2ucp
```

▲ From [the docs](#),

2

The function `cvSetCaptureProperty` sets the specified property of video capturing. Currently the function supports only video files: `CV_CAP_PROP_POS_MSEC`, `CV_CAP_PROP_POS_FRAMES`, `CV_CAP_PROP_POS_AVI_RATIO`.

NB This function currently does nothing when using the latest CVS download on linux with FFMPEG (the function contents are hidden if 0 is used and returned).

▲ Not sure if it works, but you can try to force the parameters to your values after you instantiate camera object:

1

```
import cv
cam = cv.CaptureFromCAM(-1)

os.system("v4l2-ctl --set-fmt-video=width=1920,height=1080,pixelformat=1")
os.system("v4l2-ctl --set-parm=30")

image = cv.QueryFrame(cam)
```

That's a bit hacky, so expect a crash.

Good idea, but no luck. When I try the `os.system()` calls, I get print-out that says `VIDIOC_S_FMT: failed: Device or resource busy`, which suggests to me that when `cam = cv.CaptureFromCAM(-1)` is called, `opencv` locks the camera as a resource, preventing `v4l2-ctl` from modifying it. – [Mike](#) Jul 17 at 13:15

hmmm, something I should have expected... You can try working on OpenCV code, to see what commands it sends to the camera, and what command should be sent in order to work. It may be that a simple one-line change in OpenCV will make it work. – [vasile](#) Jul 17 at 13:23

“Stack Overflow is in many ways my personal Counter-Strike.... The *design* of Stack Overflow makes helping your fellow programmers the most effective way to ‘win’....”

When your fellow users vote up your questions and answers on a Stack Exchange site, you generate **reputation**. Reputation is a rough measure of:

- how much the community trusts you
- your communication skills
- the quality and relevancy of your questions and answers

This question has an open **bounty** worth **+100** reputation from **Mike** ending in **19 minutes**.

This question has not received enough attention.

“So then the problem becomes how do you encourage groups to do what's best for the world rather than their own specific, selfish needs?”

We designed the [Stack Exchange network](#) engine to be mostly self-regulating, in that we amortize the overall moderation cost of the system across thousands of teeny-tiny slices of effort contributed by regular, everyday users. Specifically, per the [reputation privileges](#):

- Users with 15 rep can flag posts.
- Users with 500 rep can retag questions.
- Users with 2,000 rep can edit any question or answer in the system.
- Users with 3,000 rep can cast close and open votes.
- Users with 10,000 rep can cast delete and undelete votes on questions, and have access to a moderation dashboard.
- Users with 15,000 rep can protect posts.
- Users with 20,000 rep can cast delete votes on negatively voted answers.

Legend

• **Gold Badge**

Gold Badges are rare. You'll have to actively work toward these. They're something of an accomplishment!

• **Silver Badge**

Silver badges are awarded for longer term goals. Silver badges are uncommon, but definitely attainable if you're interested.

• **Bronze Badge**

Bronze badges are awarded for basic use of Stack Overflow. They are easy to earn.

• Copy Editor × 468	Edited 500 posts
• Electorate × 2181	Voted on 600 questions and 25% or more of total votes are on questions
• Famous Question × 27563	Asked a question with 10,000 views
• Fanatic × 5522	Visited the site each day for 100 consecutive days
• Great Answer × 3897	Answer score of 100 or more
• Great Question × 1594	Question score of 100 or more
• Legendary × 82	Earned 200 daily reputation 150 times
• Marshal × 271	Raised 500 helpful flags
• Populist × 1787	Highest scoring answer that outscored an accepted answer with score of more than 10 by more than 2x
• Publicist × 185	Shared a link to a question that was visited by 1000 unique IP addresses
• Reversal × 112	Provided answer of +20 score to a question of -5 score
• Stellar Question × 693	Question favorited by 100 users
• Unsung Hero × 3034	Zero score accepted answers: more than 10 and 25% of total
